Post-Op Button

CalmDown
by KRUUSE®

Helps reduce stress

Having to wear a collar can be stressful for the animal since it interferes with their vision, smell, and awareness.

To help dogs and cats feel safe, comfortable, and relaxed in surgical recovery, the CalmDown by KRUUSE® Post-Op Button is attached to the E-Collar just once with a simple click solution. It lasts for a minimum of 10 days, follows the animal wherever it goes, and positions the pheromones right under the animal's nose.

Minimises behavioural triggers such as:

Aggression

Fear

For collars without pre-punched holes a specialised tool has been developed: the CalmDown by KRUUSE® Hole Applicator.

KRCAL11

KRCAL09

KRCAL10

Innovative solution

Groundbreaking solution in animal healthcare, setting new standards for post-operative care.

Consistent effect

Works for a minimum of 10 days – wherever the animal goes and whatever it does.

Safe for all

Suitable for both cats and dogs of all ages and safe for human handling.

Foil-sealed for maximum potency

Easy application for rapid effect
