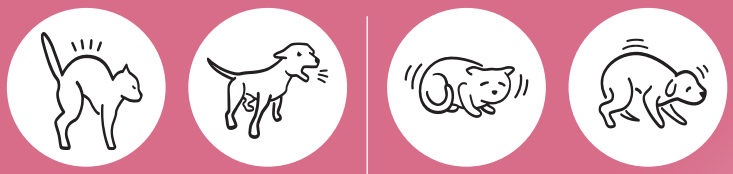
CalmDown Button

CalmDown by KRUUSE®

Helps reduce stress

The CalmDown Button is designed to help keep cats and dogs calm in a variety of stressful situations. It can be attached to Elizabethan collars to support post-operative recovery, fixed to kennels, or used with everyday collars during anxiety-inducing events such as separation, rehoming, travelling, or fireworks. The button continuously releases calming pheromones for a minimum of 10 days, staying with the animal wherever it goes by positioning the pheromone directly under its nose.

Minimises behavioural triggers such as:



Aggression | Fear
